## Opportunities \& Rewards

Clay Miller/2023

1. Christ's Admonition
a. Matt 6:19-21
i. Q: How do I re-orient my heart?
b. John 4:35
i. Q: What's true right now?
2. Rewards
a. 1 Cor 3:10-15
i. Q: What are some examples of "gold, silver and precious stones?"
ii. What happens to us (who are saved) if we build with flammable materials?
b. 2 Cor 5:10
3. General encouragement \& warnings about being fruitful with the limited time we have:
a. Mark 1:15
b. Mark 13:33
c. Luke 21:36
d. Gal 6:10
e. Eph 5:16
f. Eph 6:18
g. $\mathrm{Col} 4: 5$
h. 1 Thess 5:6
i. 1 Pet 3:15
4. Our enemy
a. Luke 4:13
i. Q: What's true about Satan?
5. Statistically (only), if the Lord tarries, I have $\qquad$ YEARS left on earth (see table below)
a. $\quad 2^{n}=\mathrm{P}$ or $(2($ Years Left-1 $)=$ Population Reachable). For example, I am a 63 -year-old (mainly) white male. Statistically I have about 20 years left on earth (if the Lord tarries). So, $2^{(20-1)}=2^{19}=524,288 \ldots$ if I disciple and train 1 man for 1 year to make disciples, and he joins me in the harvest at the end of that first year, then there will be 2 of us. At the end of the $2^{\text {nd }}$ year there will be 4 of us. 8 at the end of the $3^{\text {rd }}$ year (and so on). So, at the end of the $20^{\text {th }}$ year there will theoretically be 524,288 people making disciples! This is called spiritual multiplication.
b. Try the $\mathrm{x}^{\mathrm{n}}$ feature for yourself and let $\mathrm{x}=2$ and $\mathrm{n}=\mathrm{years}$ left on earth minus 1 - and then calculate the reachable population. Write your number here: $\qquad$
